

**FOR IMMEDIATE RELEASE**

## **Lumidigm signs deal with BioGuard, sends real world biometrics to Middle East**

**Albuquerque, NM — March 27, 2008** — Lumidigm Inc., the multispectral imaging biometrics company, today announced a certified business partnership with BioGuard Components & Technologies Ltd. Headquartered in Israel, BioGuard is an international biometrics solutions developer.

“We are pleased to be Lumidigm's business partner in Israel,” said BioGuard President Ephram Yeashoua, Esq. “The Lumidigm sensors will allow BioGuard to install biometric identity management systems where traditional biometrics have failed. Working with Lumidigm, BioGuard will be able to deploy the most robust biometric applications in the world.”

Matthew Ennis, Vice President of Business Development at Lumidigm, recently traveled to Israel to sign the deal. “BioGuard has the regional market experience Lumidigm needs as well as a thorough understanding of what makes a biometric solution work in real world deployments,” said Ennis. “This business partnership has come at the perfect time and is generating several exciting opportunities for Lumidigm.”

### **About BioGuard**

BioGuard Components & Technologies Ltd. is a leading developer of innovative, proprietary biometric solutions for a wide variety of high-performance, user-friendly biometric products and solutions. Operating as stand-alone systems or on a network, BioGuard's state-of-the-art biometric solutions are incorporated into an increasing number of systems and units at governmental and sensitive facilities, at places of business, as components of integrated security systems, and in the home. BioGuard modules and systems serve satisfied customers in the USA, Europe, the Far East, the Middle East and Africa.

### **About Lumidigm**

Lumidigm, Inc. deploys biometric systems that work quickly and effectively on all people in all environmental conditions using multispectral imaging. Lumidigm provides liveness-protected identity management for civil identification, point-of-sale, physical and logical access, time and attendance, and portable electronic device applications.
