Lumidigm Appoints Shane Robison, HP Executive Vice President and Chief Strategy and Technology Officer, to Board of Directors

Lumidigm, Inc., a New Mexico-based company that has developed a new biometric method of identifying people based on optical skin tissue measurements, has announced the addition of Shane Robison, Executive Vice President and Chief Strategy and Technology Officer of HP, to its Board of Directors.

“As Lumidigm continues to make advances in the development of LumiGuard™ technology with its strategic business partners, we seek active involvement on our Board from key industry leaders,” explained Lumidigm’s Chairman and CEO Bob Harbour. “Shane, who is responsible for shaping HP’s overall business and technology strategy and leading the company’s corporate development efforts including mergers, acquisitions, divestitures and partnerships, will provide valuable insight and guidance to Lumidigm going forward.”

“Lumidigm’s biometric technology has the potential to contribute significantly to the future of biometrics. I look forward to being a part of this innovative company’s future,” commented Robison.

About Lumidigm

Lumidigm has created an entirely new form of biometric measurement, based upon optical skin measurements that will transform product categories and enable biometrics to be used on many new products. Lumidigm, Inc. was established in July of 2001 as a separate, privately held, spin-off company from InLight Solutions. Lumidigm is located in the Science & Technology Park at the University of New Mexico, in Albuquerque, NM. The company can be contacted at 505-272-7084, on the web at www.lumidigm.com, or by email at info@lumidigm.com.
