### **Lumidigm Appoints Steve Manser, to Board of Directors**

Lumidigm, Inc., a New Mexico-based company that has developed a new biometric method of identifying people based on optical skin tissue measurements, has announced the addition of Steve Manser, Vice President of Engineering at Good Technologies, Inc., to its Board of Directors.

“As Lumidigm continues to make advances in the development of its LumiGuard™ and LumiSure technologies with its strategic business partners, we seek active involvement on our Board from key industry leaders,” explained Lumidigm’s Chairman and CEO Bob Harbour. “Steve’s extensive background in engineering and product development experience from previously held positions as Sr. Vice President of Engineering and Product Marketing at Palm, as well as holding Vice President of product development positions at Cadence and Apple, will provide valuable insight and guidance to Lumidigm going forward.”

“I am pleased to be joining Lumidigm’s Board and working with its management team to assist them bring their unique biometric technology to the market. It will be exciting to be involved with such a revolutionary technology that can reshape the biometric and security markets”, commented Steve Manser.

“Steve Manser will be replacing Shane Robison, Executive Vice President, Chief Strategy and Technology Officer of Hewlett Packard, who will be assuming a newly created position as Chairman of the Technical Advisory Committee”, explained Lumidigm’s Chairman and CEO Bob Harbour. “We are pleased that Shane will continue to work and help guide Lumidigm in to the future.”

#### **About Lumidigm**

Lumidigm has created an entirely new form of biometric and anti-spoofing technology, based upon optical skin measurements that will transform product categories and enable biometrics to be used on many new products. Lumidigm, Inc. was established in July of 2001. Lumidigm is located in the Science & Technology Park at the University of New Mexico, in Albuquerque, NM. The company can be contacted at 505-272-7084, on the web at [www.lumidigm.com](http://www.lumidigm.com), or by email at [info@lumidigm.com](mailto:info@lumidigm.com).
