

FOR IMMEDIATE RELEASE

Lumidigm Recognized as Fast-Growing Company

Albuquerque, NM — June 28, 2007 — Lumidigm, Inc. is one of New Mexico's fastest growing technology companies.

Lumidigm, the biometric sensor company that invented multispectral imaging of fingerprints, made the New Mexico Business Weekly's Fast Trackers list for the second year in a row. This annual list of New Mexico's fastest growing companies looks at companies' revenue and employee growth. Fast Trackers 2007 was published on June 22.

Lumidigm was also named as one of the Flying 40 by Technology Ventures Corp., New Mexico Bank and Trust, and KPMG. The Flying 40 is an annual list of the fastest growing companies in the technology sector in New Mexico. The 2007 Flying 40 list was published by the Albuquerque Journal on June 25. This is Lumidigm's third consecutive appearance on this list.

"Rate of growth is an important measure of our success," says Lumidigm President and CEO Bob Harbour. "We've been able to sustain momentum during new product developments."

Fast growth is no surprise to Lumidigm Board Member Stephanie Spong who says that Lumidigm has exceeded performance expectations. Spong is a Principal at the Wasatch Venture Fund, a Lumidigm investor. "We are eagerly anticipating Lumidigm's release of the high-production Venus Series Fingerprint Sensors this summer," says Spong. "This forthcoming product is already in high demand from integrators and will highlight Lumidigm as a significant player in the biometrics marketplace."
