

FOR IMMEDIATE RELEASE

Lumidigm Announces Partnership with Keico

Albuquerque, NM — July 12, 2007 — Lumidigm Inc., the worldwide patent holder of multispectral imaging for use in biometrics, today announced a strategic partnership with Keico Hightech Inc., a high-quality security terminal provider. This agreement provides Keico with Lumidigm's award-winning fingerprint sensors for their access control and time and attendance terminals. In turn, Lumidigm gains a worldwide distribution channel and a partner committed to producing the highest quality biometric terminals.

Lumidigm fingerprint sensors capture accurate and high-quality images on anyone, anytime, anywhere. Lumidigm's multispectral imaging technology simultaneously reads the surface and subsurface to capture clear, clean images every time—even when surface features are absent or hard to distinguish. Lumidigm sensors enhance the throughput and accuracy of any biometric application, thereby eliminating management hassles and end-user frustration.

“We have shown Lumidigm's multispectral imaging sensors to our customers at shows in Korea, Japan, and the United Kingdom over the last month,” said Moon Sung Hwang, President and CEO of Keico. “The quality and reliability of the data collected using a Lumidigm sensor is a vast improvement over anything else in the marketplace. We are pleased to be incorporating Lumidigm's extraordinary technology into our products.”

“Keico and Lumidigm are bringing together state-of-the-art fingerprint sensors and the highest quality biometric terminals to create the best solution for our customers,” said Matthew James, Managing Director of UK Biometrics and long term partner. “We look forward to integrating this solution for our customers.”

“We are convinced Keico will quickly create a competitive set of products around our biometric sensors,” said Bob Harbour, President and CEO of Lumidigm. “We are eager to see our joint products installed around the world. The customer demand for these completed terminals that work with real people in real world locations has been tremendous.”

About Keico Hightech Inc.

Keico Hightech Inc. pioneered the security and computer access control markets in Korea. Founded in 1989, Keico Hightech provides security systems to government security institutions, corporate entities, financial institutions and other major facilities throughout the world. Keico Hightech has set the technological standard for the security system business and is the leader in the industry in Korea. More information is available at www.keico.co.kr.

About Lumidigm

Lumidigm, Inc. develops and deploys fingerprint sensors that use multispectral imaging to capture superior images quickly, on all people, in all environmental conditions. Lumidigm provides state-of-the-art fingerprint sensors with unparalleled live-ness detection for civil identification, point-of-sale, physical and logical access, time and attendance, and portable electronic device applications. Founded in 2001, Lumidigm is headquartered in Albuquerque, New Mexico. More information is available at www.lumidigm.com.
